Featured is the daily gold chart. Price is carving out an ARAT pattern. A rise above the blue arrow calls for a target at \$3,900.00. The SIs are at support levels and the MAs are in positive alignment and rising.

The number of ounces backing GLD is unchanged at 30.4 million. The GDI closed unchanged at 75%.

Featured is GDX the miners ETF. Price is 'back testing' the latest breakout. If history repeats we should soon see another 'step up' at the latest blue arrow.

== >>> MODEL PORTFOLIO

Each report will show the trades that were completed since the last report.

Since I do most of my trading on the TSX, I will show the stock symbol for the US equivalent in brackets. Note: when trading a pink sheet listed stock, you should always buy or sell using a specific price - never a 'market' order.

To benefit from this feature, pull up a chart for any of the symbols that I buy or sell. Determine if you want to do likewise or wait for another opportunity. If you're not sure of the fundamentals, - click on the website link provided. Always make sure the index or ETF that represents the sector is in harmony with your trade. I apologize for the short time I stay in some stocks, but this is all based on chart patterns. If the chart pattern changes from positive to negative - I usually run. Here are some of my trading habits:

- **I eliminate all emotion.** Stocks are simply investments that I use to improve the bottom line. I pick a stock or commodity because I think the chart pattern looks positive. Once I decide that we are operating in a bull market, I don't bother with sell stops - I patiently wait for the stock or ETF to come back into positive territory.
- **When I do sell below my cost, I look at the loss as an opportunity to get into a winner.**
- I use the 20 day and 30 day exponential moving averages at Stockcharts.com to help me decide when to buy and when to sell. Then I draw a channel, just as I do in the reports I issue. As long as the stock stays in the channel, I'll keep it as part of the portfolio, unless I decide to take profits.
- You've heard people say: 'Buy Low – Sell High'. Here is a variation on that advice: **BUY HIGH – SELL HIGHER!** It has been my experience that buying stocks that have just broken out to a new 5 year high have been the best performers in my portfolio. When a stock or commodity has reached this stage, there is 'blue sky' ahead.
- Next I look at the supporting indicators – especially the Accumulation/ Distribution line. When a stock or commodity becomes overbought (such as trading near the top of the channel, or making a 'double or triple' top), I usually sell all or part of my holding into the rally. . Over time I try to replace these stocks during pullbacks.
- Finally I make sure that the sector in which the stock or commodity operates, is moving in the same direction as the stock of commodity that I am about to buy.

Here are some kernels of wisdom from a very successful trader, Jesse Stine:

- Emotional intelligence is of utmost importance.
- Discipline is key
- Drawdowns are lessons.
- Patience is very important
- Ignore the news media
- Have faith in your system
- Trade with confidence
- Never get attached to a stock
- Be a contrarian
- Be a lone wolf.

According to an article titled: The Strange Behavior of Gold Investors, by Dimitri Speck (link is here): <https://www.gold-eagle.com/article/strange-behavior-gold-investors-monday-thursday>

Wednesday is a day when investors usually buy gold early.

1 transaction since the last report. I purchased shares in SLVU.to at 33.91. The last 156 closed transactions resulted in 146 winners and 10 losers, producing a percentage of +93%. The reason why our portfolio is large is due to the desire to be of help to as many investors as possible. Our position in 'penny stocks' is always very conservative.

16 positions are 'under water'.

My portfolio consists of 74% precious metals, 21% in various other categories and 5% cash.

Here is my portfolio:

This chart compares silver to gold via SLV and GLD. Silver has outperformed gold since May and appears ready to break out at the blue arrow. This will be bullish for both metals. The SIs are positive and the 50DMA is rising towards the 200DMA.

Featured is SIL the silver producers ETF. Price is carving out a flag pattern. A rise above the blue arrow will continue the rally that began in May. The SIs are positive and the MAs are in positive alignment and rising.

Featured is a Uranium ETF. Price is rising inside the blue speed channel. The latest target has been reached and a pause is to be expected. A close above the blue arrow will mark the start of another rally. The SIs are positive and the green arrow points to a coming bull cross.

This chart courtesy Tradingview shows a possible path for Platinum.

Featured is the copper chart. Price broke out at the blue arrow, due to a change in tariffs applied to imports. The green arrow points to the new closing price.

Featured is XOI the oil producers index, with crude oil at the top. Price has been rising since April and the green arrow points to stiff lateral resistance. The blue arrow points to a coming bull cross. The SIs are positive.

Featured is XNG the natgas producers index, with natgas at the top. Price is slowly rising towards resistance at the 710 level. A rise above the blue arrow will mark the start of a strong rally.

=== >>> Food for Thought

... Whoever believes in Him should not perish, but have eternal life.

— John 3:15

We have been exposed repeatedly to the humanistic thesis that belief in God is irrational and unbelief is rational. Is that true? I would like to expose it for what it really is: an unmitigated fraud, an unalloyed lie that rises right up from the father of all lies.

To believe that God has made us, that there is a purpose for our lives and that we go to be with Him when we die—that is the Christian world-view.

This belief leads to meaning in life, joy, and satisfaction, purpose, and peace. Unbelief leads to hopelessness, lack of meaning and purpose, and fear of death. Unbelief is not sophisticated, it is devastating, and the result of unbelief is grief and pain. The result of belief in the God of the Bible is contentment, peace, and joy.

Belief in God is life-giving and life-sustaining.
