=== >>> Here is a link to a video interview featuring Dr. David Martin, one of the most brilliant people on the planet. In this interview Dr. Martin warns of a plan by evil plotters to kill a large number of people on July 4/2025. Distribution of this video may cause these people to cancel their evil plan.

World Debt (in \$ trillion) At Record High

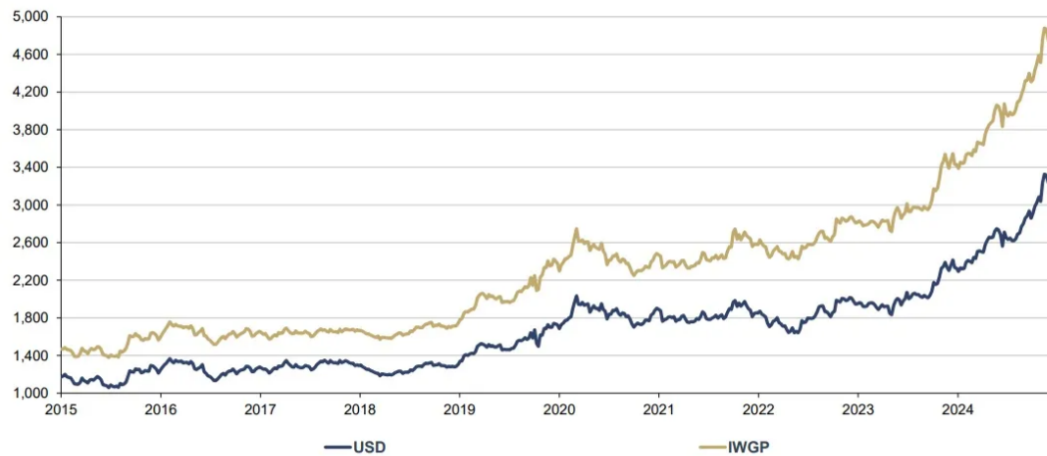

Date: March 2020 Through February 2025.
Source: Bloomberg, Bravos Research.

This chart courtesy John Rubino's substack has an interesting comment with it:

1 million seconds ago it was May 23rd.
 1 billion seconds ago it was 1993
 1 trillion seconds ago it was 30,000 BC
 The US National Debt is now rising by 2 trillion dollars per year!

incrementum

This chart courtesy incrementum.li shows gold being purchased off the Comex futures exchanges in record numbers. The possibility of 'force majeure' hangs over the exchange since the gold left at the exchange has multiple claims against it.

Featured is the daily gold chart. Price is testing the breakout at the blue arrow. A close above the brown arrow will set a target at the green arrow. The number of ounces backing GLD is unchanged at 30.1 million. The GDI is unchanged at 95%.

Valuation of Energy/Metals Companies Relative to S&P 500, 1926-Present

This chart courtesy sources listed and Jesse Felder shows the potential for growth in the resource sector.

This chart courtesy goldtadise.com shows gold in Canadian dollars. Of interest is the fact that the 50DMA has been very helpful in providing buying opportunities.

Featured is GDX the miners ETF. Price is rising inside the blue channel. The brown arrow points to a small downside reversal with a likely target at the green arrow. The SIs are positive, along with the MAs.

=== >>> MODEL PORTFOLIO

Each report will show the trades that were completed since the last report.

Since I do most of my trading on the TSX, I will show the stock symbol for the US equivalent in brackets. Note: when trading a pink sheet listed stock, you should always buy or sell using a specific price - never a 'market' order.

To benefit from this feature, pull up a chart for any of the symbols that I buy or sell. Determine if you want to do likewise or wait for another opportunity. If you're not sure of the fundamentals, - click on the website link provided. Always make sure the index or ETF that represents the sector is in harmony with your trade. I apologize for the short time I stay in some stocks, but this is all based on chart patterns. If the chart pattern changes from positive to negative - I usually run. Here are some of my trading habits:

- **I eliminate all emotion.** Stocks are simply investments that I use to improve the bottom line. I pick a stock or commodity because I think the chart pattern looks positive. Once I decide that we are operating in a bull market, I don't bother with sell stops - I patiently wait for the stock or ETF to come back into positive territory.
- **When I do sell below my cost, I look at the loss as an opportunity to get into a winner.**
- I use the 20 day and 30 day exponential moving averages at Stockcharts.com to help me decide when to buy and when to sell. Then I draw a channel, just as I do in the reports I issue. As long as the stock stays in the channel, I'll keep it as part of the portfolio, unless I decide to take profits.
- You've heard people say: 'Buy Low – Sell High'. Here is a variation on that advice: **BUY HIGH – SELL HIGHER!** It has been my experience that buying stocks that have just broken out to a new 5 year high have been the best performers in my portfolio. When a stock or commodity has reached this stage, there is 'blue sky' ahead.
- Next I look at the supporting indicators – especially the Accumulation/Distribution line. When a stock or commodity becomes overbought (such as trading near the top of the channel, or making a 'double or triple' top), I usually sell all or part of my holding into the rally. . Over time I try to replace these stocks during pullbacks.
- Finally I make sure that the sector in which the stock or commodity operates, is moving in the same direction as the stock of commodity that I am about to buy.

Here are some kernels of wisdom from a very successful trader, Jesse Stine:

- Emotional intelligence is of utmost importance.
- Discipline is key
- Drawdowns are lessons.
- Patience is very important
- Ignore the news media
- Have faith in your system
- Trade with confidence
- Never get attached to a stock
- Be a contrarian
- Be a lone wolf.

According to an article titled: The Strange Behavior of Gold Investors, by Dimitri Speck (link is here): <https://www.gold-eagle.com/article/strange-behavior-gold-investors-monday-thursday>

Wednesday is a day when investors usually buy gold early.

5 transactions since the last report. I purchased shares in HSLV.to at 2.74; also ARIS.to at 8.71. also OR.to at 35.96; also SSL.to at 12.45; also LIO.v at 0.325; The last 145 closed transactions resulted in 135 winners and 10 losers, producing a percentage of +93%. The reason why our portfolio is large is due to the desire to be of help to as many investors as possible. Our position in 'penny stocks' is always very conservative.

18 positions are 'under water'. 2 positions are 'free' (they have doubled).

My portfolio consists of 65% precious metals, 20% in various other categories and 15% cash.

Gold and silver US\$ 2025

©2025 MacleodFinance

This chart courtesy Macleod Finance shows the trend for silver is closing in on gold.

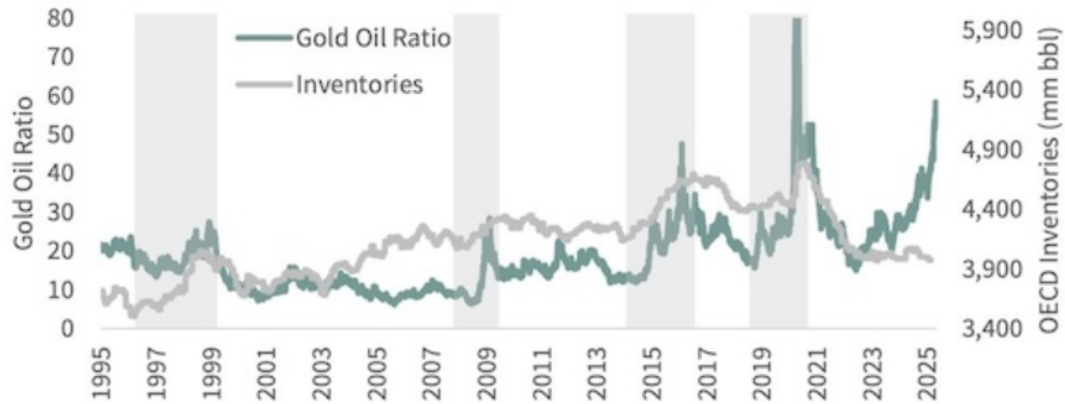

Featured is the daily silver chart. Price has broken out from a trading range. A test of the breakout is possible, but by rising above the blue arrow, price has set a target at 40.00. The SIs are positive along with the MAs. The number of ounces backing SLV increased from 471.2 to 472.2 million.

Featured is SIL the silver producers ETF. Price has reached the top of the blue channel and a pullback appears to be underway. There are 2 areas of support. The SIs are positive, along with the MAs.

Featured is URNM the Uranium ETF. Price has reached our first target, after rising inside the blue speed channel. The blue arrow points to support. The brown arrow points to upside volume, which is 3 and 4 times downside volume (bullish).

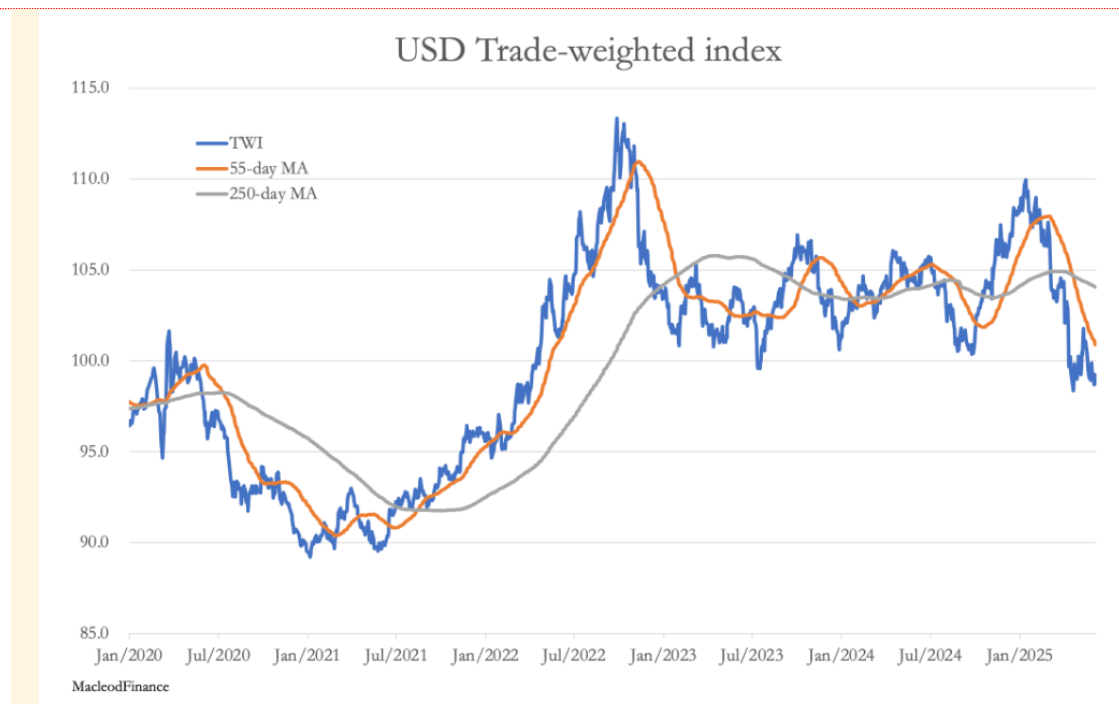

FIGURE 6 Gold - Oil Ratio & OECD Inventories

Source: Bloomberg & IEA.

This chart courtesy Bloomberg tells us that if gold continues to widen the gap between gold and oil, it may be prudent for investors to add an oil stock to the portfolio.

Featured is COPX a copper ETF. Price is breaking out from a downward sloping channel. The SIs are positive but the MAs remain in negative alignment. The brown arrow points to resistance on the way to the green arrow target.

This chart courtesy Macleod Finance shows the US dollar index is breaking down below support.

Pain Is Never Wasted

Your rod and Your staff, they comfort me.

— Psalm 23:4

Human beings are often in need, in trouble, in pain. People need comfort. We try to find it in various places, from a mother's hug to a bottle of wine.

We can certainly get comfort from each other. But Christ is the only source of real comfort for us. What is the purpose of His comfort in our lives? Of course, it is to assuage our heart's needs, to ease our aching spirits, to uplift us, to reanimate us, to encourage us, to help us on the way to continue fighting the battle. Also, it is, as Paul says, "that we may be able to comfort them which are in any trouble."

There is nothing more painful than suffering that seems to be without purpose. Let me tell you, however, there is no such thing. Paul says that we are comforted in all of our tribulation so that we may be able to comfort others in their trouble with the same comfort wherewith we ourselves are comforted by God.

God's comfort works because God can handle our pain and trouble. When it is past, we can look back and see His hand and then reach out and comfort others.

Isaiah 53 is written in 3 tenses.

- v2 'He shall grow up as a tender plant' (future).
v3 'He is despised and rejected of men, a man of sorrows and acquainted with grief' (present).
v4 'Surely He has borne our griefs and carried our sorrows (past).

According to Rabi Jonathan Cahn this shows that Jesus died for our sins - past, present and future.
