=== >>> A number of our subscribers are receiving the daily gold cycle report and judging by the feedback we've received - people are happy! In the event that you would like to receive that report just make sure you have supported us during the past 24 months. That's all it takes.

Featured is the daily gold chart. Price is carving out a bullish ARAT pattern. A confirmed rise above the blue arrow sets up a target at \$3950. The SIs are positive and the MAs are in positive alignment and rising. The number of ounces backing GLD rose from 30.0 to 30.1 million. The GDI closed unchanged at 95%.

Featured is the weekly gold chart. The green arrows point to bottoms in the 7-8 week gold cycle, the brown arrows point to tops. Next week will be #3 in the current cycle.

Featured is GDX the miners ETF. Price is rising inside the blue channel. The advance above the blue arrow has been back checked and confirmed. There is 'blue sky' ahead. The SIs are positive and the MAs are in positive alignment and rising.

### === >>> MODEL PORTFOLIO

Each report will show the trades that were completed since the last report.

Since I do most of my trading on the TSX, I will show the stock symbol for the US equivalent in brackets. Note: when trading a pink sheet listed stock, you should always buy or sell using a specific price - never a 'market' order.

To benefit from this feature, pull up a chart for any of the symbols that I buy or sell. Determine if you want to do likewise or wait for another opportunity. If you're not sure of the fundamentals, - click on the website link provided. Always make sure the index or ETF that represents the sector is in harmony with your trade. I apologize for the short time I stay in some stocks, but this is all based on chart patterns. If the chart pattern changes from positive to negative - I usually run. Here are some of my trading habits:

- **I eliminate all emotion.** Stocks are simply investments that I use to improve the bottom line. I pick a stock or commodity because I think the chart pattern looks positive. Once I decide that we are operating in a bull market, I don't bother with sell stops - I patiently wait for the stock or ETF to come back into positive territory.
- **When I do sell below my cost, I look at the loss as an opportunity to get into a winner.**
- I use the 20 day and 30 day exponential moving averages at Stockcharts.com to help me decide when to buy and when to sell. Then I draw a channel, just as I do in the reports I issue. As long as the stock stays in the channel, I'll keep it as part of the portfolio, unless I decide to take profits.
- You've heard people say: 'Buy Low – Sell High'. Here is a variation on that advice: **BUY HIGH – SELL HIGHER!** It has been my experience that buying stocks that have just broken out to a new 5 year high have been the best performers in my portfolio. When a stock or commodity has reached this stage, there is 'blue sky' ahead.
- Next I look at the supporting indicators – especially the Accumulation/Distribution line. When a stock or commodity becomes overbought (such as trading near the top of the channel, or making a 'double or triple' top), I usually sell all or part of my holding into the rally. . Over time I try to replace these stocks during pullbacks.
- Finally I make sure that the sector in which the stock or commodity operates, is moving in the same direction as the stock of commodity that I am about to buy.

Here are some kernels of wisdom from a very successful trader, Jesse Stine:

- Emotional intelligence is of utmost importance.
- Discipline is key
- Drawdowns are lessons.
- Patience is very important
- Ignore the news media
- Have faith in your system
- Trade with confidence
- Never get attached to a stock
- Be a contrarian
- Be a lone wolf.

According to an article titled: The Strange Behavior of Gold Investors, by Dimitri Speck (link is here): <https://www.gold-eagle.com/article/strange-behavior-gold-investors-monday-thursday>

Monday is a day when investors usually sell gold early.

3 transactions since the last report. I took profits with my shares in TVE.to at 4.89. I purchased shares in SSRM.to at 17.01; also MAU.v at 4.29 The last 146 closed transactions resulted in 136 winners and 10 losers, producing a percentage of +93%. The reason why our portfolio is large is due to the desire to be of help to as many investors as possible. Our position in 'penny stocks' is always very conservative.

18 positions are 'under water'. 2 positions are 'free' (they have doubled).

**My portfolio consists of 70% precious metals, 20% in various other categories and 10% cash.**

Featured is the silver chart. Price is back testing the upside breakout from a trading range. The target is 40.00. The SIs are positive and the MAs are in positive alignment and rising. The number of ounces backing SLV is unchanged.

Featured is SIL the silver producers ETF. Price is rising inside the blue channel. The pattern is a bullish pennant. A rise above the blue arrow will mark the continuation of the rally that started at the bottom of the blue flagpole. The green arrow points to a large amount of 'up volume' during the start of the current rally. The SIs are positive and the MAs are in positive alignment and rising.

**FIGURE 1** Commodities - Dow Ratio

This chart courtesy sources listed shows the ratio between commodities and the DOW favors commodities.

This chart courtesy Capitalist Exploit shows US shale oil production has peaked.

Featured is XOI the oil producers index, with crude oil at the top. Price is trying to break out of the brown channel, at the blue arrow. The brown arrow points to resistance, the green arrow points to a target. The SIs are positive, but the MAs are negative.

Featured is XNG the natgas producers index, with natgas at the top. Price is rising inside the blue channel. The advance above the blue arrow sets up a target at the green arrow. The SIs are positive and the MAs are in positive alignment.

Featured is URA a Uranium ETF. Price is rising inside the blue speed channel. The blue arrow points to a gap that may have to be filled, but the green arrow points to very high volume during the breakout. This may be a sign that the gap can be ignored. The brown arrow points to a coming bull cross.

Featured is COPX a copper ETF. Price is trying to break out from the down-sloping channel, at the blue arrow. The brown arrow points to resistance on the way to the target at the green arrow. The SIs are positive but the MAs remain in negative alignment.

=== >>> Food for Thought

I can do all things because of Christ who strengthens me.

— Philippians 4:13

We were created by God to do great things, to soar high and to make an impact upon our world for Him. In fact, most of the great

men and women who have accomplished impressive things in this world have been men and women who have dreamed dreams of what God, by His grace, could do in their lives. I suppose everybody has dreamed dreams. The problem is that we all as children had great visions, but alas, as we grew up, most of those dreams faded away. They are destroyed by that pesky voice that whispers, "You can't do it. You never have, you never could, and you never will."

So like acid rain that falls upon our dreams, they slowly disappear. Our great visions fade and our ambitions corrode because we believe the negative words of the devil: "You can't, you can't, you can't." And so, we invent all kinds of reasons why we can't.

The apostle Paul had no such limitations. He said, "I can do all things through Christ who strengthens me" (Philippians 4:13). Paul is not talking about PMA—a "Positive Mental Attitude." He did not say, "I can do all things through PMA"—but through Jesus.

May God help us to realize that we can do all things through Christ. He is the creator of dreams and the source of our strength.
